COORDINATING COMMITTEE

RECORD OF STATEMENT BY THE GERMAN DELEGATE

ON

UNITED KINGDOM PROPOSAL CONCERNING ELECTROMETERS

25th April, 1960

Present: Belgium(Luxembourg), Canada, France, Germany, Italy, Japan,
Netherlands, Turkey, United Kingdom, United States.

References: COCOM Docs. 3715.21/2 and 3.

1. The Delegate referred to the United Kingdom Memorandum on electrometers (COCOM 3715.21/2) and to the subsequent record of discussion thereon (COCOM 3715.21/3). During the discussion of the 31st March, the Delegate had been unable to give final views, since his authorities had not concluded their study of the United Kingdom paper. He had now been instructed, however, to state that, in his Government's view, the D.C. amplifiers built into certain electrometers did not attain the cut-off level indicated in Item 1521(d). They therefore did not find that electrometers could be regarded as under embargo by virtue of Administrative Principle No. 3.
